A4 Roll DTF Printer $750-880

A4 DTF Printer – Compact & Efficient Direct-to-Film Printing for Apparel Customization

The A4 DTF Printer is a powerful and compact solution designed for businesses and creators looking to produce high-quality custom prints on a variety of textiles. This Direct-to-Film (DTF) printer allows users to transfer vibrant, durable designs onto T-shirts, hoodies, hats, tote bags, and more with ease. Unlike traditional printing methods, DTF technology ensures superior color accuracy, flexibility, and long-lasting results on both light and dark fabrics.

Designed for small businesses, startup brands, and DIY creators, the A4 DTF Printer is easy to use and offers excellent print quality without requiring complex setup or maintenance. It supports white ink printing, enabling clear, bold designs on dark fabrics, and delivers high-resolution output with fine details and rich colors. The prints are stretchable, crack-resistant, and washable, ensuring long-term durability and customer satisfaction.

With its efficient workflow, the A4 DTF Printer simplifies the printing process: print your design onto a special transfer film, apply the adhesive powder, and heat press it onto your fabric. This process eliminates the need for costly pretreatment and provides greater versatility compared to traditional DTG or sublimation printing.

Ideal for small businesses, promotional product makers, and individuals looking to expand their customization capabilities, the A4 DTF Printer is an affordable yet professional solution for creating high-quality, custom-printed apparel with minimal effort.

Key Features:

- Compact A4 Size – Perfect for small spaces and startup businesses

- Vibrant, High-Resolution Prints – Produces sharp and colorful designs

- White Ink Support – Allows printing on dark fabrics with excellent opacity

- Durable & Flexible Prints – Wash-resistant, crack-proof, and stretchable

- Easy-to-Use Process – No pretreatment required, simple printing and heat transfer

Take your custom apparel printing to the next level with the A4 DTF Printer—a reliable and cost-effective solution for high-quality textile decoration.

Advantage: Our self-developed motherboard replaces the original EPSON motherboard

1. There will be no EPSON waste ink reset;
2. There will no longer be various sensor malfunctions of the original EPSON;
3. Roll to roll printing, uninterrupted printing;
4. Supports single page printing;
5.Equipped with automatic cleaning function, there is no need to remove the film during cleaning;
6.After cleaning, print directly without the need to reinstall the film.
7.When printing, the film will not slip, and the thickness of the PET film is not limited. Is it double-sided matte;
8. Try to preserve the EPSON structure as much as possible without increasing the volume of the printer;
9 Standard white ink mixer system, automatic timing, intermittent mixing;
10. The steel plate box packaging is more sturdy and leaves space for one roll of 100 meter long PET film.

Specification:
Printer Type: A4 Roll DTF Printer
Printer Nozzle Type: EPSON xp600
Software Setting Precision: 14401440dpi, 28801440dpi, 5760*1440dpi
Print Speed: Approx. 30 seconds (photo mode)
The Amount of Ink Drops: 1.5 Microliters
Print Software: AcroRIP White ver10.3 (Free)
Maximum Width: 21 cm
Print Interface: USB 2.0 Data Cable
Color Configuration of Printing: Six colors: CMYK LC LM or CMYK+2W
Method of Ink Supply: Continuous Ink Supply System (CISS)
Temperature of Working Environment: 15°C - 28°C
Power: 100W
Voltage/Plug: 110V-220V (International/US/EU/UK/India Standards)
White Ink Mixer: Included
Printer Size: 37.5 cm x 40.6 cm x 15 cm
Net Weight of Printer: 6 kg
Size of Package (Steel Box): 60 cm x 47 cm x 27 cm
Gross Weight: 16 kg
Computer Operating System: Win7-11
Computer Processor: Intel, AMD
