

**A3/A4/Roll PET DTF Transfer Film****\$0.1-0.3/Pcs**

DTF Transfer Film – Premium Film for Vibrant, Durable Prints on Apparel and Accessories

Our DTF Transfer Film is designed specifically for use with DTF printers, enabling the seamless transfer of high-quality, vibrant designs onto a wide variety of products, including T-shirts, hoodies, hats, shoes, and more. After printing your designs on the film, the transfer process ensures crisp, durable prints that adhere perfectly to fabrics, delivering exceptional color richness and long-lasting results.

Available in both A3/A4 sheets and roll formats, our DTF Transfer Film provides flexibility to meet the needs of different printing projects, whether you're producing small batches of custom apparel or large-scale orders. This versatile film ensures sharp details, vibrant colors, and smooth transfers, making it the ideal choice for personalized products in fashion, sports, and promotional items.

Compatible with both light and dark fabrics, our DTF Transfer Film is engineered for efficient use, producing high-quality prints with minimal waste. Whether you're printing for a small business or a high-volume production environment, this film guarantees consistent performance, ease of use, and excellent results with every print.

**Key Features:**

- **High-Quality Transfer:** Perfect for transferring vibrant, durable designs onto various fabrics
- **Versatile Application:** Suitable for T-shirts, hats, shoes, bags, and more
- **Two Formats Available:** Available in A3/A4 sheets or roll formats to suit different production needs
- **Compatible with Light & Dark Fabrics:** Ideal for a wide range of fabric types, ensuring excellent print quality on both light and dark materials
- **Durable & Long-Lasting:** Transfers are crisp, vivid, and resistant to wear and washing

Whether you're a small business owner or a large-scale producer, our DTF Transfer Film ensures consistent, high-quality prints that will help you stand out in the custom printing market.

**Application:**

DTF (Direct-to-Film) technology offers a cutting-edge solution for printing transfers onto a variety of materials, including cotton, polyester, 50/50 blends, leather, nylon, and more. Unlike white toner printers, DTF eliminates the need for A+B paper pressing, providing a more efficient and versatile method for custom decoration.
